Professional Experience

Lead Web Developer, Nubbernaut LLC

Northampton, MA — 6 years

A founding role at this consulting firm improving small businesses' infrastructure and web presence.

- Architecting and implementing green-field projects in Google Cloud, React, and Wordpress for client payroll, inventory, content management, and sales funnel/SEO systems
- Taking ownership of complex systems to migrate and maintain clients' existing projects, setting up new testing and deployment pipelines to increase stability and performance
- Working directly with clients to define and estimate work, train employees and stakeholders on new systems and features, and identify problem areas and directions for new work
- Setting internal standards for quality of code and documentation for the rest of the company, mentoring other developers, and sharing new techniques with the team

Senior Instructor, General Assembly

New York, NY — 2 years

In addition to primary cohorts at the New York headquarters, traveled across the country to jumpstart branches in new locations. Many students stay in touch, expressing gratitude even years later.

- Taught 3 full-time bootcamps, over 100 students with **90%** job placement after 6 months
- Received an average student feedback rating of **4.65 / 5**, the top 95th percentile of instructors
- Created curriculum resources distributed & taught to students around the globe
- Students went on to work at employers such as Google, BackerKit, Viacom, and PR Newswire

Project Consultant, Max Cantor Studios LLC

Various — 4 years

Various projects with clients and collaborators at companies of all shapes and sizes, including non-profits, independent game studios, and other consulting firms.

- **Siege Games** — Ported [Crea](#) to Linux & worked on an extensive Python modding API
- **Art & Logic** — AppEngine CRM sales and OKR tracker for an internal team at Google
- [Beautiful Vim Cheat Sheet](#) — Personal project crowdfunded for \$12,000 in two weeks
- **Tunapanda/Certell** — Management of web, iOS and Android apps for collaborating nonprofits
- **The LAMP** — Created curriculum materials for an early education class on writing Twine apps
